# Adnoc sets new industry standard at Ras Al Sadr

Ras Al Sadr is the second field discovered across the block, underlining the attractiveness of Abu Dhabi's world-class oil and gas resources

ABU DHABI / WAM

Adnoc has returned to the Ras Al Sadr field to start gas production, 75 years after the first exploration well was drilled at the field. Back in the 1950s, as the Middle East's oil industry was being established, Abu Dhabi's first ever exploratory well was drilled in Ras Al Sadr.

While the well was "dry" and Abu Dhabi's first commercial discovery came from another field, Ras Al Sadr is essentially where the oil and gas industry of Abu Dhabi started.

# Asian stock markets rally on inflation relief

TOKYO/ WAM

Asian stock markets rallied on Thursday, buoyed by Wall Street's surge to all-time peaks overnight after a milder US inflation report raised expectations the Federal Reserve will deliver two interest rate cuts this year, *Reuters* reported.

The dollar remained on the back foot, sagging to fresh multi-week lows against peers including the euro and sterling.

US Treasury yields extended their retreat in Tokyo trading, sinking to six-week troughs. That helped the beaten-down yen to continue its recovery, even as data showed the Japanese economy contracted more than expected in the first quarter. Gold marched back towards record levels and crude oil added to gains after rebounding strongly overnight from a two-month trough.

US data showed the consumer price index (CPI) rose by 0.3 percent in April, below an expected 0.4 percent gain, raising hopes the Fed can cut rates by 50 basis points this year, with the first quarter-point reduction fully priced for September.

The data provided succour to markets after higher-than-expected US consumer prices in the first quarter had led to a sharp paring of rate cut bets and even stoked some worries of an additional hike.

ing open-source tools and industry standards to optimise AI software for efficient AI workloads.

Thomas Pramotedham, CEO of Presight, said, "Together, we combine Intel's leading technology capabilities with our deep insights in big data and AI, aiming to drive significant advancements."

"This collaboration goes beyond technical achievements; it's about creating real value and lasting impact on our stakeholders and society."

The MoU will include both entities engaging in mutual collaboration and innovation, knowledge-sharing through technical workshops, and developing technology roadmaps to empower and upskill developers in optimised AI application development. This will help create cutting-edge AI solutions that address the region's unique challenges and opportunities.

The MoU will focus on strengthening AI data security and privacy by implementing confidential AI technologies – including safeguarding sensitive data used in AI models during the AI lifecycle, from data training to inference stages.

Leveraging Intel trust authority technologies, the platforms running AI models will be verified for trustworthiness, ensuring data security and integrity throughout the AI ecosystem

## Tokyo stocks mixed on hopes of US rate cuts

TOKYO / WAM
