CBUAE unveils Dirham symbol as UAE joins FX Global Code

The CBUAE announced the progress of the Issuance and Circulation of the Digital Dirham, a key initiative of the Financial Infrastructure Transformation (FIT) Programme launched by the CBUAE in 2023

ABU DHABI / WAM

The Central Bank of the UAE (CBUAE) on Thursday unveiled the new symbol for the UAE's national currency, the "Dirham", in a move that embodies the vision of the wise leadership, and the directives and ongoing support of His Highness Sheikh Mansour bin Zayed Al Nahyan, Vice President, Deputy Prime Minister, Chairman of the Presidential Court, and Chairman of the Board of the CBUAE, in strengthening the UAE's position as a leading global financial

The CBUAE also announced the progress of the Issuance and Circulation of the Digital Dirham, a key initiative of the Financial Infrastructure Transformation (FIT) Pro-

The CBUAE has developed an integrated and secure platform for the issuance, circulation, and use of the Digital Dirham, including a Digital Dirham wallet

gramme launched by the CBUAE in 2023, aiming to bolster the UAE's position as a pioneer in Financial Market Infrastructure (FMI) and a destination for excellence in financial products innovation and digitalisation.

The UAE's Digital Dirham is

underpinned by Federal Decree-Law No (54) of 2023 amending certain provisions of Federal Decree-Law No (14) of 2018 concerning the Central Bank and Regulation of Financial Institutions and Activities. This will ensure the acceptance of the Digital Dirham as a universal payment instrument (legal tender) in all payment outlets and channels alongside physical currency.

The unveiling of the new dirham symbol is in conjunction with the CBUAE's recent joining to the FX Global Code, becoming the first central bank in the Arab region to do so, comes as part of the CBUAE's efforts to establish the UAE Dirham as an international currency, along with enhancing the integrity and best practices in the exchange market of the na-

tional currency against foreign currencies and promoting ethical practices and sound professional rules for its participants.

THE DIGITAL DIRHAM: TECHNOLOGICAL AND SECURITY ADVANTAGES

The CBUAE issues the "Digital Dirham" as a digital version of the UAE's national currency, characterised by high levels of security and efficiency, contributing to reduced costs of payments through its reliance on blockchain technology, which by its technical design insures effective risk management, data protection/privacy, and atomic transaction completion.

Individuals and businesses will be able to obtain the Digital Dirham through licensed financial institutions, such as banks,

The issuance of the Digital Dirham is expected to take place in the last quarter of the year 2025 for retail sector.

The Digital Dirham offers several key advantages and characteristics that drive development and innovation, including:

• Tokenisation: The Digital Dirham facilitates tokenisation, enhancing financial inclusion and efficiency, and expanding access to liquidity through digital asset fractionalisation.

• Smart Contracts: The Digital Dirham is used with smart contracts to programme the execution of complex transactions automatically, settling them instantly, in addition to multi-

stage and multi-party transactions that involve conditions or obligations.

Hamad International Airport Unveils State-of-the-Art Concourses D and E

DOHA / GULF TIME

Hamad International Airport (DOH), ranked as the World's Best Airport and Airport Shopping by Skytrax 2024, has officially unveiled its highly anticipated Concourses D and E, marking a major milestone in its expansion and increasing its capacity to over 65 million passengers annually.

This development elevates traveller comfort and further establishes Doha as a key global aviation hub. The expansion project, which began in 2018, has now been completed with the opening of Concourse D and E, marking the culmination of the airport's ambitious development plan. This milestone represents the final phase of a transformational journey initiated in 2022 with the unveiling of the ORCHARD, a 6,000-square-meter indoor tropical garden.

The new concourses integrate seamlessly into the existing terminal, introducing cutting-edge technology and enhanced facilities to meet growing passenger demand. The terminal now spans 842,000 square meters—a 14% increase—while the addition of 17 new aircraft contact gates increases the total to 62, nearly 40% more than before, ensuring greater connectivity, streamlined operations, and significantly reducing bus transfers.

Qatar Airways Group Chief Executive Officer, Engr. Badr Mohammed Al-Meer, said: "Hamad International Airport is more than a gateway; it is a vital pillar of Qatar's growth and global connectivity. I am pleased to see this expansion project, with conclusion of both concourses going live, which I have personally been involved with since 2018. While many global airport expansions have faced delays, we are proud to have delivered this major development ahead of schedule."

Migration Granary (2024), by Anga Art Collective: Migration Granary (2024) is an architectural complex symbolising the resilience and hardship of historical and contemporary pressures of migration. Constructed from local materials, the granary in Hili Archaeological Park, Al Ain, offers an intimate space for reflection on migration. The work critiques alienating modern infrastructures in proposing an environment that encourages empathy for displaced people and ecology. The contemplative archival space relating to migration's challenges connects with Al Ain's historical significance as a site of human settlement and movement. Anga Art Collective explores the cultural and geographic urgencies of Assam.

Together they crafted a wooden ping pong table, which travelled through neighbourhoods across Abu Dhabi, sparking spontaneous encounters with the communities. The shop was open from 8pm to 2am until March 12 where the public could interact with the ping pong table, serving as a "communication device." These in-situ interventions imbue the project with a performative aspect, generating new urban scenographies and narratives that respond directly to the

The park features three traditional elements in the UAE: a dhow (sailing vessel) transformed into an interactive playground, a water fountain for playing and where children can learn about local fish such as the hamour, and a gargour (traditional fishing trap) whose dome is reimagined as an area to spark creativity. Deep Spaces (2024) by Lúcia Koch: Deep Spaces (2024) conceived for Abu Dhabi's urban environment consists of a series of interventions wherein those photographs are inserted into existing advertising panels rented for the Biennial's duration in densely populated areas in the city centre, including Hamdan Street and Electra Street. In advertising no apparent product or brand, the nature of these images or reason for them is questioned. In her large-scale photographs of the empty interiors of cardboard boxes, the artist reimagines these mundane containers as architectural spaces that challenge perception. Lúcia Koch is an interdisciplinary artist working across photography, video, architectural interventions, and large-scale installations. She utilises materials that block, filter, or redirect light, transforming them into altered visual experiences.
