Dubai public transport records 348 million riders in H1

The RTA continues implementing plans to integrate public transport, shared mobility services, among others

DUBAI / WAM

Dubai's public transport network, shared mobility services and taxis carried around 348.1 million riders during the first half of 2026, with average daily ridership reaching nearly 1.9 million, according to the Roads and Transport Authority (RTA).

The figures cover Dubai Metro, Dubai Tram, public buses, marine transport, taxis and shared mobility services, including app-based vehicles, hourly rentals and bus-on-demand. Limousines separately carried 5.7 million riders during the same period.

Mattar Al Tayer, Director-General and Chairman of the Board of Executive Directors of the RTA, said the figures reflect the success of Dubai's vision to build a world-class integrated transport system based on sustainability and innovation, making

public transport the preferred mobility option for residents and visitors.

He said growing public confidence in the transport network has strengthened the culture of sustainable mobility, raising the share of trips made using public transport and shared mobility from 6 percent in 2006 to 22.3 percent in 2025. He added that the figures demonstrate the success of the RTA's long-term investments and policies aimed at enhancing Dubai's global competitiveness and quality of life.

Al Tayer said the RTA is implementing a strategic vision that includes major infrastructure expansions, led by the approval of the Dubai Metro Gold Line, a 42-kilometre route with 18 stations at an estimated cost of AED34 billion. Looking ahead, Al Tayer said the RTA began operating driverless taxis earlier this year and is preparing to launch commercial air taxi services before the end of 2026, while continuing work on the Dubai Loop project.

Al Tayer said Dubai Metro ac-

Taxis followed with 25.5 percent (88.9 million riders), while public buses carried 85.1 million passengers, representing 24.4 percent of total ridership. Together, these three modes accounted for around 89 percent of all passenger journeys.

He added that January recorded the highest monthly ridership with 73.4 million passengers, while the remaining months each registered between 49 million and 66 million riders. Shared mobility services carried 25.7 million passengers, marine transport handled 8.1 million riders, and Dubai Tram carried 3.8 million passengers.
